## A B S T R A C T

Here is disclosed a pad being relatively large in its longitudinal direction and comprising a liquid-pervious  
5 topsheet, a liquid-impervious backsheet, a liquid-absorbent core interposed between these top- and backsheets and an cover sheet lying outside the backsheet and extending from an intermediate region to a rear region of the pad. The cover sheet has fixed side edge portions fixed to transversely opposite side  
10 edges of the pad, a fixed end portion fixed to a rear end portion of the pad and a free portion extending between the fixed side edge portions and the fixed end portion and let free from the pad so that a pocket opening from the side of the front region toward the side of the rear region is defined between the  
15 backsheet and the cover sheet.
